DECORATIVE FRENCH 12 LITE 1 PANEL DOOR SHOWN IN MDF WITH CLEAR GLASS

DECORATIVE FRENCH 12 LITE DOOR SHOWN IN OAK WITH CASHMERESM ACRYLIC GLASS

Timeless Craftsmanship

Since the late 1700s, wood doors have been built with separate components designed to interlock together, known as "stile & rail construction". Today, at Masonite we continue with this time-tested tradition in crafting our Wood Door Collection.

explore the possibilities of your own design

- 10 wood species
- 44 door styles
- 38 glass options
- 1,000's of possibilities

12 LITE FRENCH OVER 1 PANEL DOORS SHOWN IN MCF WITH CLEAR GLASS

your home your canvas

your creativity

Revamp, redo and renovate your home passageways and get a whole new outlook indoors.

- French Doors increase light in any room. Choose from a variety of beautiful design combinations of glass and wood.
- Wood Panel Doors feature traditional and contemporary panel configurations in a range of distinctive wood species.
- Louver Doors enhance the ambience of any room with the added benefit of air ventilation between spaces.
- Bifold Doors accentuate any room with a coordinated look with or without glass in your choice of wood.

About Masonite's Wood Door Collection

Construction of stile & rail doors

Masonite's Wood Door Collection boasts a variety of high-grade wood species, precision handcrafted using vertical stiles and horizontal rails in your choice of panels and glass, ready to stain or paint.

design flexibility

Stile & rail construction offers virtually limitless door styles, configurations, panel and sticking profiles.

environmentally friendly

Masonite is committed to creating beautiful designs without sacrificing the environment, by using wood products from well managed forests.

hand-crafted engineering

Stile & rail door construction has distinct joinery and better depth and definition. This results in crisp, clean lines that are architecturally correct. Each door is crafted by hand, ensuring a perfect fit.

enhanced stability

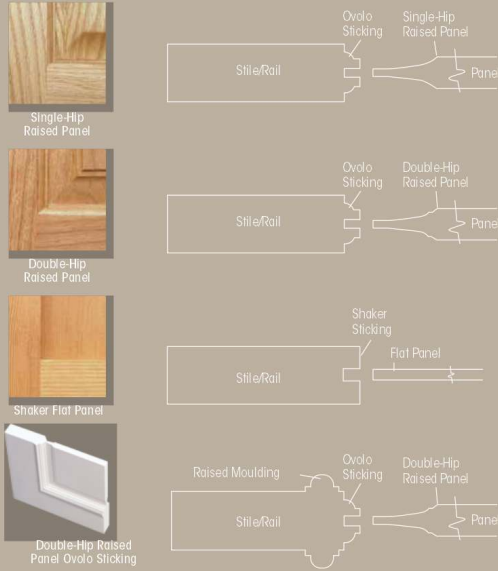

Because stile & rail doors are built with separate components, the door parts can naturally contract and expand with ambient humidity changes without warping or bending. This is a significant improvement over door manufacturing that involves routing out or stamping a solid piece of wood that is prone to warping. Engineered wood materials are used to enhance structural and environmental performance.

stile & rail doors defined

- Stile:** vertical pieces of the door
- Rail:** horizontal pieces of the door; includes top, bottom and sometimes lock rails
- Panel:** pieces that fit within the surrounding stile & rail frame that come in different profile designs – single-hip, double-hip and flat
- Mullion:** narrow vertical sections between panels
- Muntin:** slim vertical pieces used to separate panes of glass, grille bar
- Sticking:** the design of the profile edge on the stile and rail; ovolo is curved and rounded, shaker is straight and squared

panel/sticking options

Raised moulding available only on square-top primed MDF doors.

Wood Types & Species

The difference between soft and hardwoods is simple – softwood comes from trees with cones and hardwood comes from trees with leaves. Wood species vary in grain color and uniformity.

select your glass

choose your wood species

choose your style

staining power

Every wood door can be stained to create a rich custom finish. Hardwoods such as Cherry and Oak feature exquisite grain detail and convey a warm, inviting look in darker stains. The subtle grain detail of Maple in a light stain exudes a more contemporary look. Softwoods, such as pine, have more resins and color variations and are well-suited for casual interiors.

wood species

Cherry: Hardwood
One of the richer, more elegant woods with a fine, uniform straight grain and texture. A popular choice for today's home.

Clear Pine: Softwood
Natural characteristics include an indistinct grain, contrasting color and occasional sap specks, streaks and knots – ideal for a variety of interiors.

Hemlock: Softwood
A pale brown appearance with reddish hue – hemlock's light wood grain pattern is sure to enhance any décor and looks great in light to dark stains.

Knotty Alder: Hardwood
Prominent rustic markings with classic wood knots give knotty alder wood a timeless look that blends nicely in a variety of casual themed interiors.

Knotty Pine: Softwood
An old-time favorite – the rustic appearance of knotty pine and its imperfect characteristics make it a perfect choice for a country look.

Maple: Hardwood
Distinguished by its smooth, even and fine grain, maple's light color and sleek look makes it increasingly popular in contemporary interiors.

Oak: Hardwood
Classic open-grain patterns and noticeable variations in oak's hearty color provide natural warmth with rich texture that coordinates beautifully with any décor.

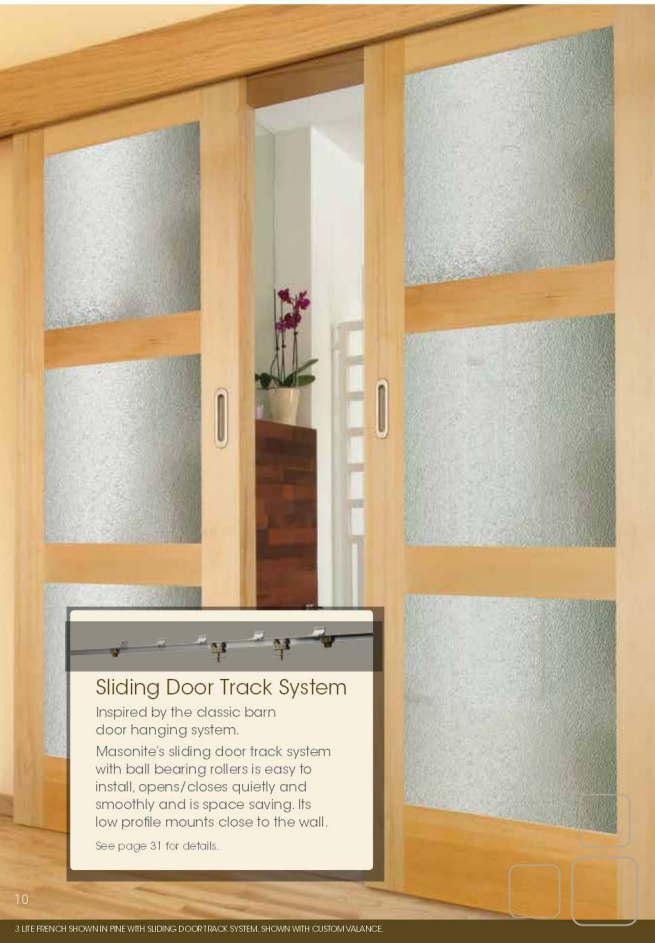

Poplar: Hardwood
A versatile member of the magnolia family, poplar's fine texture and grayish sapwood color with greenish brown heart is frequently finished to look like other woods.

Radiata Pine: Softwood
A common-grade wood with light-brown to chestnut-brown hues that captures dark and light stains well, making it an excellent choice for modest designer budgets.

MDF: Paint Grade
Masonite doors made of smooth MDF composite panels, stiles and rails, come factory-primed and ready to paint.

About Masonite's Wood Door Collection

Masonite's Wood Door Collection uses engineered wood materials to enhance structural and environmental performance.

Sliding Door Track System

Inspired by the classic barn door hanging system.

Masonite's sliding door track system with ball bearing rollers is easy to install, opens/closes quietly and smoothly and is space saving. Its low profile mounts close to the wall.

See page 31 for details.

A breath of fresh air for your eyes

Enhance your home with the ambience of light and the warmth of wood. French Doors create visual interest while maintaining exceptional functionality.

eastern influence

A striking fusion of natural textiles & artisan design

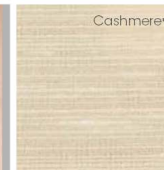

Transform any room in your home with inviting textures and compelling interplay of light and shadow with our new line of natural fabrics, captured in acrylic paneled doors. Three exquisite designs offered in your choice of wood present an excellent solution for casual spaces and private retreats.

These new natural décor panels are produced using hand-applied techniques. Fabric layout and coverage will vary slightly with each door panel due to the artisan nature of the manufacturing process. Natural materials may change color over time and may vary in size, shape, color and texture within a single panel.

Cashmere®: Understated elegance of refined, slubbed-linen dresses this alluring panel. Intricately woven fabric is infused with silk, cotton and reeds resulting in a textural horizontal pattern to inspire any décor.

Jacquard®: Light dances through the tranquil lines of the sophisticated rawness of this linen style panel. Its exceptional appearance is tailor-made for any interior doorway in the home.

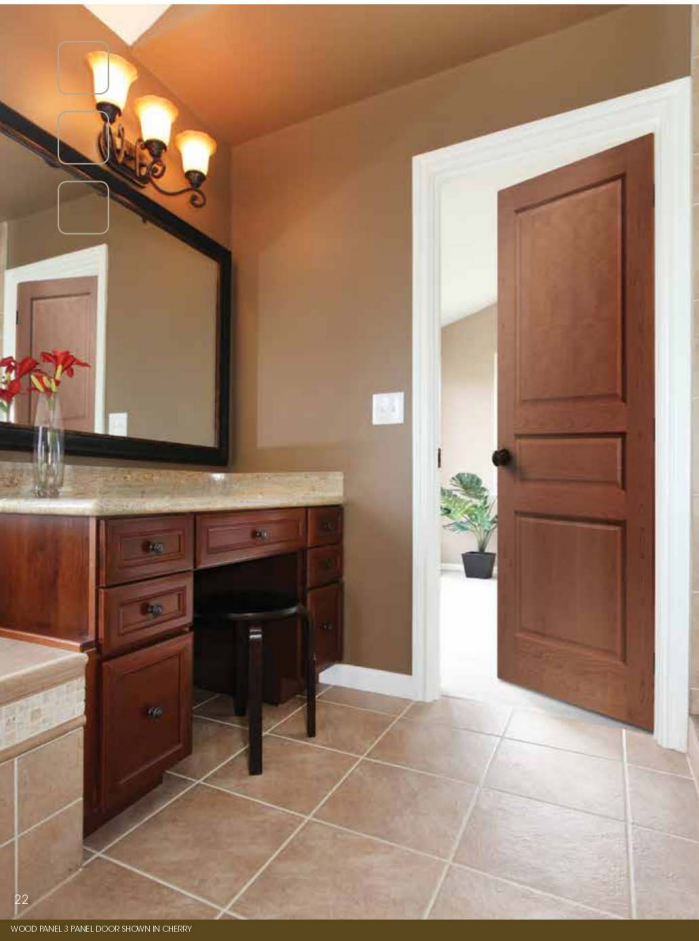

Tapas®: Appealing textile design is hand-made with an organic, raffia-like, open weave that captures natural and ambient light for a dramatic effect, making it an exceptional focal point for any room.

Masonite's commitment

At Masonite, employees from all parts of the Company – sales, marketing, research and development, customer service and manufacturing – understand that people love their homes. In the past, homes were purchased to meet functional needs.

Today, homes are purchased to meet specific lifestyles and to satisfy the need to create multiple living environments within a single home. To meet these lifestyle needs, Masonite is continually creating new and innovative products that will make every home more beautiful, more valuable and more enjoyable. With the ultimate goal of adding beauty and value to every home.

Masonite's products are designed and constructed to exacting standards and specifications. All materials – wood, fiberglass, steel or composites – are engineered and carefully selected to ensure lasting durability and timeless performance. For individuals who are building, renovating or redecorating, Masonite products are certain to beauty and accentuate a wide array of architectural home styles.
